NiMH Vs NiCd

Descriptions

Some batteries are available in different capacities. Replacing an original with a higher capacity may cause problems with the charging circuit and/or never charge the battery to full capacity anyway, so we recommend replacing with similar capacity batteries only.

This Cross-Reference List is to be used as a guide only.

Please be sure to check POLARITY, VOLTAGE & SIZE before installing. WES Components A/Asia will not be held responsible for damage caused due to the incorrect selection and installation of his range of cordless phone batteries.

E.O.E - All information contained herein is assumed to be accurate, however no responsibility is accepted by WES Components A/Asia for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

Please assist us in the addition, omission and correction of this list where possible by contacting one of our sales representatives. sales@wes.net.au

2V SEALED LEAD ACID CELLS

Descriptions

Highly reliable battery used in military, medical, security etc. In float, they last up to ten years before they fall to 80% of the rated capacity. Due to their low impedance, discharge current can be very high without risk of damage. They can be fully recharged in less than 1 Hr! using a constant V of 2.35 volts per cell, NO current limiting is required. Do not dry out and can be charged in any position.

2 VOLTS ea. Made in the USA

CHARGER / CONDITIONER Ni-Cd & Ni-MH

Descriptions

Will test, charge/discharge (condition) both Ni-Cd and the new Ni-MH cells. Compatible with a majority of the early and some late model camcorders with 4.8v or 6v batteries. Includes extra contacts for sensor terminals. Update to Ni-MH battery technology. We have Ni-MH batteries to suit your camcorder. Ni-MH batteries offer higher charge capacity and give a longer service life, and with this charger you can still charge your older Ni-Cd batteries. Includes 240V power pack and a car cigarette lighter lead. Displays Charge state and capacity. Simple push button control with automatic circuitry.

Short Description

Updated version of our MP750 unit. Now includes Ni-MH charging capability

NI-CD CAMCORDER RECHARGEABLES

Descriptions

These will last longer & give extended life compared to normal replacement Ni-Cd batteries. A discharge circuit is built inside the battery for maintenance. Before you want to charge the battery, simply press the button and the battery will fully self discharge. This will extend battery life and reduce memory effect, giving you maximum power every time. Easy to use with three status LEDs; Full, Discharging and Empty. High quality construction with the cells made in Japan. All are 6V 1800mAh
